1. INTRODUCTION

The right to privacy is an integral human right recognised and protected in the South African Constitution and in the Protection of Personal Information Act 4 of 2013 ("POPIA"). POPIA aims to promote the protection of privacy through providing guiding principles that are intended to be applied to the processing of personal information in a context-sensitive manner. Through the provision of quality goods and services, Unum Capital Group of companies including Unum Capital (Pty) Ltd '**Company**' is necessarily involved in the collection, use and disclosure of certain aspects of the personal information of clients, employees, and other stakeholders.

A person's right to privacy entails having control over his or her personal information and being able to conduct his or her affairs relatively free from unwanted intrusions. The absence of this policy and procedure will expose the company to unnecessary risk and create a burden in respect of financial and other regulatory requirements. The Company subscribes to the principles espoused in the Protection of Personal Information Act and the Constitution of South Africa in respect of:

- 1.1 The lawful processing of client data by the company acting as a responsible corporate citizen; and
- 1.2 The identification and allocation of accountability, where personal data is processed contrary to the prescripts of the Act.

2. POLICY PURPOSE

The purpose of this policy is to protect the Company from the compliance risks associated with the protection of personal information which includes:

- 2.1 Breaches of confidentiality. For instance, the Company could suffer loss in revenue where it is found that the personal information of data subjects has been shared or disclosed inappropriately.
- 2.2 Failing to offer choice. For instance, all data subjects should be free to choose how and for what purpose the Company uses information relating to them.
- 2.3 Reputational damage. For instance, the organisation could suffer a decline in shareholder value following an adverse event such as a computer hacker deleting the personal information held by the organisation.
